To obtain Students Feedback on Curriculum during the academic year 2018- 19, IQAC of this college designed a questionnaire. This printed questionnaire was distributed to the Under Graduate students. To get an unbiased and objective response from the respondents, they were asked not to write their names in the questionnaire.

Observations:

Student's feedback curriculum

Feedback on curriculum is collected for the year 2018-2019. The feedback is collected from the stakeholders and analyzed by IQAC.

Student's feedback analysis:

Feedback questions for students are structured with six question curriculum. The questions are to be answered on five rating scale beginning with Very Good, Good, Average and Needs Improvement.

Correlation between title of the paper and contents of syllabus:

The syllabus should provide enough detail for students to understand what is expected of them and how the course proceeds. Optimally, the course syllabus should generate interest and motivate students to take responsibility to learn the contents of the course.

The above table depicts that around 65 % students rated very good and 35 % rated good about the correlation between title of the paper and contents of syllabus therefore the overall opinion is highly positive.

Size of syllabus in terms of loads on the student:

According to students about 57 % were rated very good and around 27 % of students rated good and about 15 % of students just given an average opinion on the size of the syllabus.

Relevance of theory syllabus with practical / lab work:

Practical work has clear benefits, helping students acquire the essential skills that not only give a fluid transition to higher-study, but open the doors to science as a profession. Science practicals are one of the fundamental tools enabling our students to learn scientific knowledge.

According to students responses, only 42 % of students rated very good, around 48% of students just agreed and about 6% of students just gave average opinion and 3% of students asked for the improvement of relevance of theory of syllabus with practical/lab work. It means around 10% of the students wants improvement and half the respondents are looking for additional lab facilities.

Connectivity with preceding year syllabus:

The syllabus needs revision in terms of preparing the student for the professional scenario relevant and suitable to cater the needs of industry in present day context and it should be organically linked from first semester to the last one.

About 60% of students strongly agreed 22% of students agreed and about 6% of students gave average opinion an about 10% of students said that the connectivity with preceding year syllabus should be developed.

Distribution of the teaching hours among course components:

A teacher allocated the maximum face-to-face teaching hours is to be allocated 20 to 30 hours per week to undertake the work directly related to the teaching and learning program of their class or classes with the remaining 8 hours available for other activities.

About 46% students strongly agreed 34% of them just agreed about 16% gave average opinion and about 1% of them said for the improvement. Around 17% of the respondents are looking forward for changes in the distribution of teaching hours.

Overall opinion on the curriculum:

It is the curriculum that determines to a large extent whether education is inclusive, thus playing a significant role in ensuring that provision is equitable. It is the curriculum that provides the structure for the provision of quality learning. And it is the curriculum that articulates both the competencies necessary for lifelong learning and the competencies needed for holistic development.

About 53% of students gave a strong opinion on overall opinion on the curriculum, where as about 28% of them gave an agreement about 13% of them gave average opinion and about 4% of the students said that there should be development. It can be concluded that around 17% of the students wants improvement in the curriculum, which is taken into account.
